Physical Address:
75 Prince Street, 2660

Postal Address:
PO Box 142, Bloemhof, 2660

Stop the Silent Leak.

Your outsourced fuel management department — delivering competitive buying power, absolute control, and daily reporting for transport fleets across South Africa and cross-border. Fuel is your biggest running cost, and the hardest to control. Between volatile price swings, diesel theft, heavy bank fees, and endless admin, money quietly vanishes into thin air.

TFFL is your outsourced fuel solution.

We negotiate & manage fuel transactions across a network of 300+ depots, accounting for every single litre and delivering comprehensive reporting.

More Than Just Diesel: Complete Fleet Support

Keeping trucks moving takes more than fuel.
That's why we offer comprehensive, 24/7 support for your entire journey:

Roadside Assistance

If things go wrong on the road, we are one call away to help coordinate breakdown recovery and get your truck moving again.

En-Route Amenities

Keep your fleet and drivers in top condition with authorized access to bin washes, premium oil purchases, and safe overnight stays.

24/7 Operations

Transport never sleeps, and neither do we. Our team and systems are available around the clock.

Cost-Effective Routing

We help you map out the most economical routes, maximizing your fuel efficiency and minimizing transit times.

How It Works: Your Simple, Controlled Fuel System

1 Fund Your Account

Getting started is as simple as loading credit into your TFFL account to cover your planned diesel usage.

2 We Secure the Best Price

Operating as your outsourced fuel buying desk, we negotiate discounted per-litre rates on your behalf — securing pricing advantages that are nearly impossible to achieve independently.

3 Place an Order & Fuel Instantly

When your truck needs diesel, simply submit a fuel order for a specific depot. Our system instantly coordinates with that exact location to authorize the transaction. When your driver arrives with their order number, they pull up and fill immediately — no bank cards to swipe, little to no manual authorizations, and little to no on-site admin.

4 Exact-Litre Accounting

You are billed with absolute precision. If you authorize an order for 500 litres but the truck's tank is full at 476.45 litres, your account is only charged for the 476.45 litres dispensed. Every drop is tracked. We provide detailed sheets showing your exact transactions, live account balances, and transparent reporting.

TOTAL CONTROL
Every litre. Every rand. Every depot.

TOTAL VISIBILITY
Live portal. Live balances. Live depot stock.

TOTAL RELIABILITY
24/7 support. Zero downtime. Always on the move.

TOTAL PARTNERSHIP
We don't just supply fuel. We power your business.

TOTAL VISIBILITY & CONTROL — YOUR LIVE FUEL PORTAL

TFFL isn't a service you have to phone and wait on. You get a secure online portal that puts your whole fuel operation at your fingertips:

- **PLACE AND AUTHORIZE ORDERS YOURSELF,** any depot, any time.
- **LIVE ACCOUNT BALANCES** that update in real time — not just an end-of-day sheet.
- **REAL-TIME DEPOT STOCK:** see which depots currently have diesel before you send a truck, so you never fuel on guesswork.
- **STATEMENTS, ORDER HISTORY, AND PROOF OF PAYMENT** — all self-service, all in one place.

NEVER TURNED AWAY — AUTOMATIC RE-ROUTING

What if a depot ran dry? The system handles it. If your chosen depot is out of stock, **TFFL automatically reroutes** the order to the nearest depot that has fuel — so your truck keeps moving instead of sitting idle or backtracking. No phone calls, no wasted kilometres.

FULL CONTROL OVER SUB-CONTRACTORS

Running sub-contractors? Load them straight onto your TFFL system and manage their diesel exactly like your own fleet — same order authorization, same real-time billing, same live reporting. You keep complete control and visibility over **every litre** they draw, on your account, on your terms.

DESIGNED TO STOP DIESEL THEFT

Diesel theft is one of the biggest silent leaks in any fleet — and our system is built to stop it:

- **NO BANK CARDS TO SWIPE** — nothing to clone, share, or skim, and no bank card fees.
- **ORDER-NUMBER AUTHORIZATION** — fuel is only released against a specific order you approved.
- **EXACT-LITRE RECONCILIATION** — every drop dispensed is matched to what was authorized, per truck.
- **ONE ACCOUNT, FULL AUDIT TRAIL** — including sub contractors — so unapproved litres have nowhere to hide

TOTAL CONTROL
Every litre. Every rand. Every depot.

TOTAL VISIBILITY
Live portal. Live balances. Live depot stock.

TOTAL RELIABILITY
24/7 support. Zero downtime. Always on the move.

TOTAL PARTNERSHIP
We don't just supply fuel. We power your business.

SEAMLESS SOFTWARE INTEGRATION

You do not have to overhaul your current workflow to work with us. TFFL offers a direct ordering API so your operational team can place fuel orders, track balances, and manage routes entirely from within your own familiar **TMS/ERP** software environment.

WHO YOU'RE WORKING WITH

TFFL is built on decades of hands-on fuel and logistics experience, backed by a control room that never sleeps:

Edward Londt — Owner.
28 years in the fuel industry.

Yolandie Malherbe — Chief Executive Officer.
24 years in logistics, overseeing our account and order controllers.

Gerrit Lemstra — IT Specialist.
25 years in IT.

6 dedicated account & order controllers working day and night shifts — real people watching your fuel around the clock.

READY TO STOP THE LEAK? GETTING STARTED IS EASY.

Simply send us your truck count, registration numbers, and your desired routes or depots, and we will handle the rest.
